

# Shubhankar Kumar

UI/UX Designer

 [shubhankar.kr24@gmail.com](mailto:shubhankar.kr24@gmail.com) |  +91 7808709989 |  @imSHUBHANKAR |  @mrshubhankar

## Summary

Highly motivated UI/UX Designer and Frontend Developer with a strong foundation in computer science. Committed to continuous learning and teamwork, specialising in web and app development. Skilled in creative arts for idea generation, adept at multitasking, and delivering innovative solutions in collaborative environments.

## Experience

### Intern at Agsure Innovations Pvt. Ltd.

Aug 2024 – Sep 2024

Domain: Frontend Web Developer | React Developer

- Designed and implemented the UI/UX for an Admin Dashboard using Figma, focusing on seamless user interactions.
- Built entire dashboard from the ground up, integrating API data to manage real-time user information effectively.
- Developed secure registration and login pages using HTTP method, enhancing user authentication and data protection.
- Utilized React Hooks to optimize state management, leading to a reduction in memory usage and faster reusable component (in JSX) rendering and maintain the documentation for the project on Confluence.

## Project Work

### A University Chat-App

Mar 2024

Domain: Mobile App UI-UX Design | Tool- Figma (Visit:- [Click](#))

- It is based on a mobile chat application which has the feature of chatting with different users that focus on college-going students.
- A different section of Home, E-Room, RMS, and To-Do Sections
- This UI-Prototype has E-Room functions that enable the user to search empty rooms. Also having a To-Do feature that enables a good user- experience.

### A Finance Website (Visit:- [Click](#))

Feb 2024

Domain: Website UI-UX Design | Tool- Figma

- This is a finance-related website including wonderful dashboard which aims to attract the user and get more traffic.
- I have improved the existing UI website so that it will look like an aesthetic.
- I have used wireframes and prototypes by seeing different design patterns on Dribbble.com.
- Users can believe that the website is genuine.

### A Payment App (Visit:- [Click](#))

Dec 2024

Domain: UI-UX Design | Tool- Figma

- User can login with a small credential with OTP.
- User can scan the QR code of their Debit/Credit card and then user get an OTP on their registered mobile number after entering OTP they can get their balance statements.
- Users get their profile and notifications also.
