Summary

Highly motivated Frontend and UI/UX Developer with a strong foundation in computer science. Committed to continuous learning and teamwork, specialising in web and app development. Skilled in creative arts for idea generation, adept at multitasking, and delivering innovative solutions in collaborative environments.

Skills

Languages: C++, JavaScript, SQL
Technologies: HTML, CSS, Tailwind CSS, React.js, MongoDB, Django, React Native, MySQL
Tools: Git/GitHub, Jira, MS Word, Excel, PowerPoint, Outlook, Figma, Framer, Docker

Project Work

AI-Interview Website   **May 2024**

Domain: Frontend web Application | Languages: JavaScript

- Developed a responsive frontend web application utilizing HTML5, CSS3, and JavaScript, with React.js for enhanced interactivity.
- Implemented React Hooks for efficient state management, resulting in a smoother user experience.
- Built interactive About Us, Contact Us, and Services sections, prioritising clear navigation and user-friendly content, reducing user bounce rate.
- Employed a three-phase Software Development Life Cycle (SDLC) methodology to streamline development and ensure rapid iteration, completing the project within 7 weeks.
